Education

Virginia Tech. B.S. in Computer Science

Expected May 2027

Minors in Mathematics and Cybersecurity

Blacksburg, VA

- Cumulative GPA: **3.9** — In-Major GPA: **4.0**
- Relevant coursework: Computer Systems, Software Design, Cloud Software Development

Experience

CACI International Inc

May 2026 – Present

Software Engineer Intern (Cloud & AI Platforms)

Ashburn, VA

- Led the team's first Agile sprint as Scrum Master by facilitating sprint planning, daily stand-ups, sprint reviews, and cross-team coordination to support on-time project delivery.
- Built and deployed cloud-native applications using GitLab CI/CD, Docker, Kaniko, Harbor, FluxCD, and Kubernetes while collaborating with IT and cybersecurity teams to meet enterprise networking, identity, and security requirements.
- Deployed and maintained enterprise AI platform services, including Open WebUI and LiteLLM, within a shared Kubernetes environment, supporting staging and production deployments and migrating authentication from Keycloak to Microsoft Entra SSO.

Luxx LLC — luxx.dev

Dec. 2021 – Present

Founder & Software Engineer

Remote

- Founded and operate Luxx LLC, independently designing, developing, deploying, and maintaining production full-stack applications, APIs, and cloud infrastructure from conception through long-term operation.
- Built and scaled CountBot to 450,000+ users across 20,000+ Discord servers, supporting 81 paying customers through subscription-based premium features.
- Architected and managed production infrastructure including Docker, PostgreSQL, reverse proxies, CI/CD pipelines, and Linux VPS administration to deliver reliable software deployments and services.
- Engineered a production migration from MongoDB (Mongoose) to PostgreSQL (Drizzle ORM), migrating millions of documents with custom Bash migration tooling while minimizing service downtime.
- Continuously improved a large production codebase through architectural refactoring, modern framework adoption, and scalable software design to enhance maintainability and support long-term growth.

Fairfax Water

May 2024 – Jul 2024 & May 2025 – Aug. 2025

Operational Technologies Network Aide Intern

Herndon, VA

- Automated monthly water quality reporting by developing an Excel VBA application that transformed operational data into state-compliant CSV reports, reducing manual data processing.
- Installed, configured, and commissioned industrial control system hardware, including PLCs, PID controllers, residual analyzers, and RS-485 communication networks integrating Chemtrac and Precision Digital devices to support water treatment operations.
- Administered Operational Technology (OT) infrastructure by configuring Active Directory user accounts, workstation policies, and security settings to support secure access and system reliability.
- Supported critical water treatment operations by assisting with PLC modernization projects, reviewing operational equipment and documentation, and improving operational workflows across treatment facilities.

Projects

PassionDev — passion.dev | *TypeScript, Fastify, Next.js*

Dec. 2025

- Designed and developed a full-stack web platform connecting university students with collaborators for technical projects based on shared interests, commitment, and goals.
- Built a modern web application using TanStack Start, Fastify, TypeScript, PostgreSQL, and Drizzle ORM with secure authentication through Better Auth and role-based authorization.
- Architected a scalable application foundation with modular APIs, GitHub integration, and containerized deployment to support future platform growth and feature expansion.

Technical Skills

Languages: TypeScript, Java, Python, C, SQL, HTML, CSS, Bash, Visual Basic

Frameworks & Libraries: TanStack Start, SvelteKit, React, Next.js, Fastify, Express, Expo, Vite, Drizzle ORM

Databases: PostgreSQL, MongoDB

Cloud & DevOps: Docker, Kubernetes, FluxCD, Linux, NGINX, Cloudflare, GitHub Actions, GitLab CI/CD

Developer Tools: Git, GitHub, GitLab

Web & Enterprise Technologies: REST APIs, WebSockets, CORS, OAuth 2.0, Microsoft Entra ID, Better Auth, LiteLLM, Open WebUI, SEO, Web Standards
